
PRESS RELEASE

VICCS, Inc. To Provide Business Continuity, Recovery, Virtualization and Green IT Technologies for the Mid-Market

VICCS to Provide Off-the-Shelf Software, Services and Storage Solutions for Business Continuation, Recovery, Virtualization and Consolidation ("Green IT") Applications

Rockville, Md. – 18-Nov-08: After 20 years of Global Management Consulting with Public Sector and Large Commercial Businesses, Vertex Information & Computer Consulting Services Corporation (VICCS, Inc.), today announced its entry in the Mid-Market Business Continuity, Virtualization and Green IT marketplace with an array of software and services for companies looking to improve their business continuity protection, consolidate their data centers (servers and storage) and ensure that their data and information is backed up, safe from disaster and is recoverable in light of an unplanned event. The company will provide software and services from IBM®, EMC®, Microsoft®, VMWare® and other well known companies to mid-market commercial and Government customers.

According to Mr. Robert Weiner, VICCS Director of Sales & Marketing for VICCS, "VICCS is expanding its market presence in the mid-market in large part fueled by customer requirements to ensure their continued business operations in the event of a disaster or a more likely unscheduled event. Customer concerns about reducing their server and storage footprint, reducing IT complexity and saving energy are big topics with customers today".

VICCS' offerings in this area of technology include a full range of software, services and hardware from industry leading manufacturers. According to Ms. Mellina Soheili, CEO of VICCS, "VICCS products and related services in this area of the market are best of breed and will empower companies to store, retrieve, protect, and secure their systems and data with an effective ROI to take them into the Future". The technology is crucial to a customer's long-term business strategy.

With the announcement of products and services for Business Continuity and Recovery (BCRS) and Virtualization, VICCS is building on its long time experience and large customer base as a premier systems integration and professional consulting services firm, to provide customers with superior off-the-shelf software and services for Business Continuity, Recovery, Virtualization and Green IT initiatives.

To facilitate and formally announce VICCS's BCRS products and services, VICCS will hold a series of seminars that will educate and enlighten organizations on how to take advantage of these cost saving technologies.

The next seminar, "Business Continuity & Virtualization for the 21st Century" will be held at:

That's Amore Restaurant - Southern Italian Cuisine
15201 Shady Grove Road, Rockville, MD 20850
Wednesday, November 19, 2008 from 11:30 AM – 2:30 PM

Register at marketing@viccs.com or call at 301-984-1355 ext 269.

The upcoming seminar will cover the following topics:

- What is Business Continuity and Recovery?
- Information & Operational Protection - Software & Hardware for Compliance, Backup, Recovery, Archive & Data De-Duplication
- Virtualization in the 21st Century
