
PRESS RELEASE

VICCS, Inc. Provides Content Enabled ERP Technology

VICCS to Provide Software and Services to Integrate Content Management Systems with ERP Systems

Rockville, Md. – 28-Oct-08: VICCS, Inc. continues its entry into the commercial mid-market with a series of products and services designed to integrate leading ERP systems with Content Management technology to provide a comprehensive business solution for improving customer service and ensuring access to corporate data. VICCS will demonstrate the technology at a seminar to be held on October 28, 2008 in Tyson's Corner, VA.

According to Mr. Robert Weiner, VICCS Director of Sales & Marketing for VICCS' commercial division, "Companies today deploy both ERP systems and Content Management systems as two distinct and separate technologies. In reality, combining the two technologies provides tremendous benefits in the areas of improving customer service, improving access to corporate data needed to resolve customer issues and streamlining costs associated with delivering superior customer service."

To facilitate and formally announce VICCS' entry into the commercial mid-market, VICCS will hold a series of luncheon seminars starting in September, 08 to educate and enlighten organizations on how to take advantage of these cost saving technologies. The seminar series continues through December 2008

Participants: Register for any of VICCS Technology Events at www.viccs.com/events.html or marketing@viccs.com or call 301-984-1355 ext 262.

VICCS Content Enabler provides:

- Virtualized ERP & Content Management
- Content Enabled ERP which combines the use of a Content Management system with an ERP system to improve Customer operations and access to Corporate Data.
- Link various data transactions in the ERP to customer's actual documents and content.
- Improves Business processes and lowers associated costs for delivering customer services by providing fast, easy access to customer documents.

New Company Direction and Expansion

With the move into these new market segments, VICCS is building on its long time experience and large customer base as premier systems integration and professional consulting services to provide customers with superior off-the-shelf software and services for ERP, Content and Document Management, Business Continuity and Virtualization. Going in the future, VICCS will continue to provide ERP solutions as well as offering the following package software products.

- Content Management and ERP – from VICCS "Content ERP Enabler" release TBA
- ERP solutions from IBM - SAP®, Oracle & Microsoft Dynamics
- Content Management Solutions – using Microsoft SharePoint™ , IBM FileNet® And EMC Documentum
- Business Continuity and Disaster Solutions – from IBM and EMC Corporation
- Virtualization – using IBM VMWare® and Microsoft
