# PRESS RELEASE

## VICCS, Inc., A Leading Services Provider to Federal, DoD and Public Sector markets Announces New “Content Enabling” Software for the ERP Market!

*VICCS Content Enabler™ will Integrate COTS ERP and Content Management System Technology to Provide Enhanced Access to Financial Data and Related Content Records*

**Rockville, Md. – 28-Oct-08:** Vertex Information & Computer Consulting Services Corporation (VICCS), today announced its product strategy for enabling ERP with Content management Systems software to provide an integrated view of financial data and related Content and documents. The VICCS **Content Enabler** is a Value Added software module for the ERP and Content Management marketplace. VICCS' **Content Enabler** will integrate ERP software from IBM®, Oracle®, SAP®, and Microsoft™ with any leading Content Management system.

According to Mr. Kamran Sohelli, Vice President of Technical Services for VICCS, “Our Company is bringing this product to market based on increasing demands in the Federal and Public Sector as organizations look for better ways to increase the value of their investments in these two mission critical technologies and to provide better services at lower costs. VICCS' **Content Enabler** will allow organizations to view ERP based financial information while providing immediate access to related unstructured and structured content. All available via the ERP. VICCS is ready to successfully implement these new products and solution offerings for our Federal Government and Public Sector customers”.

### New Company Direction and Expansion

With it's growth in the Federal and Public markets, VICCS continues to build on its extensive experience and large customer base as a premier systems integration and professional consulting services with superior solutions for COTS ERP, Content and Document Management, Business Continuity and Virtualization. Moving forward, VICCS will provide ERP solutions as well as offerings in the business areas:

- Content Management and ERP Integration – Using VICCS **Content Enabler**™
- ERP solutions from IBM - SAP®, Oracle & Microsoft Dynamics
- Content Management Solutions – from Microsoft SharePoint™ , IBM FileNet® And EMC Documentum™
- Business Continuity and Disaster Solutions – from IBM and EMC Corporation
- Virtualization – using VMWare® and Microsoft

The software from these leading companies will be sold, supported, deployed, implemented and customized using VICCS Nationwide Professional IT Employee, Consultants and Teaming Partners. According to Mr. Kamran Sohelli, Vice President of Technical Services for VICCS, “The entry of VICCS' product software products combined with our other services based solution offerings will provide Federal and Public Sector with 360° solutions.

## **VICCS, INC., A LEADING SERVICES PROVIDER TO FEDERAL, DOD AND PUBLIC SECTOR MARKETS ANNOUNCES NEW "CONTENT ENABLING" SOFTWARE FOR THE ERP MARKET!**

VICCS's expertise in delivering software products and services as total solutions for customers sets VICCS apart as a "One Stop Solutions Provider". Soheili added "In the past, companies turned to VICCS for our industry expertise and our ability to turn complex problems into everyday business solutions as part of a professional services offering. Now, we are further enabled to bring to our customers product based solutions and support. Our federal Government and Public Sector customers will be able to purchase software, services and implementation from one vendor to take advantage of VICCS's extensive experience implementing solutions, COTS software and services with minimum customization".
